

**STRINGER PASTURE  
CATTLE AND HORSE ALLOTMENT**  
2011 Annual Operating Instructions  
Cascade Ranger District  
Boise National Forest

**INTRODUCTION**

The Annual Operating Instructions (AOI) provide direction for livestock management and how it will be conducted on the Stringer Pasture Cattle and Horse allotment during the 2011 grazing season.

<b>Allotment</b>	<b>Permittee</b>	<b>Permit Number</b>
Stringer Pasture C&H	Harry Bettis	01244

<b>Permitted Use</b>				
<b>Permittee</b>	<b>Allotment</b>	<b>No. of Livestock</b>	<b>Livestock Class</b>	<b>Permitted Season</b>
Bettis	Stringer Pasture C&H	25	Cow/Calf	5/25 – 7/10
Bettis	Stringer Pasture C&H	25	Cow/Calf	8/25 – 10/1

<b>Authorized Use</b>				
<b>Permittee</b>	<b>Allotment</b>	<b>No. of Livestock</b>	<b>Livestock Class</b>	<b>Authorized Season</b>
Bettis	Stringer Pasture C&H	25	Cow/Calf	6/5 – 7/20
Bettis	Stringer Pasture C&H	25	Cow/Calf	8/25 – 10/1

<b>Non-Use</b>				
<b>Permittee</b>	<b>Allotment</b>	<b>No. of Livestock</b>	<b>Resource Protection</b>	<b>Personal Convenience</b>
Bettis	Stringer Pasture C&H			
Bettis	Stringer Pasture C&H			

There will be a total of 250 cow/calf cattle permitted under “on/off” provisions of this permit to graze the Stringer Pasture C&H allotment.

Permitted Livestock Brands:

Harry Bettis

T – Left Ribs

## **COMPLIANCE**

This AOI is made part of your grazing permit consistent with Part 1, item 3 and Part 2, Item 8(a). Situations may develop during the grazing season that requires changes to these instructions. If this becomes necessary, or if you cannot comply with some part of these instructions, contact the District Ranger and obtain approval before initiating changes or deviating from these instructions.

All hay, straw and mulch products used on the Boise National Forest must be certified as weed-free or weed/seed-free by a qualified inspector of the State of Idaho or neighboring states which have weed-free feed or crop certification programs (Region Special Order Number: 04-00-097).

## **PREVIOUS YEAR GRAZING RESULTS**

The Stringer Pasture C&H allotment was grazed with 250 head of cattle under on/off provisions. Cattle entered the North Pasture (see map on page 7) on May 25 and remained until July 10. Cattle entered the South Pasture on August 25 and remained until November 1.

## **2011 GRAZING SCHEDULE**

Cattle will enter the North Pasture (see map on page 7) on June 5 and will remain until July 20 or until utilization levels are met, whichever comes first.

Cattle will enter the South Pasture on August 25 and will remain until October 1 or until utilization levels are met, whichever comes first.

Cattle will be removed from a pasture when allowable use of 45 percent in the riparian areas is reached; or when 4-inch stubble height of hydric species is retained; or when allowable use of 40 percent for the early season pasture and 50 percent for the late season pasture in the non-riparian areas is reached. Livestock grazing in the allotment is not allowed between July 20 and August 24.

## **BILLING**

The grazing fee for the 2011 grazing season is \$1.35 per head month for cattle.

We are required to use the Lock Box system. Send your grazing fees to the address specified on your grazing bill. We cannot accept payments at the District or Forest Supervisor's Office. Allow adequate time for your payment to be received and processed. A minimum of 5 days should be allowed for this process. Livestock may not be placed on the allotment until the District Ranger has received notification that the grazing fees have been paid. Placing or allowing livestock onto National Forest System lands prior to payment of grazing fees is a violation of your term grazing permit and may result in the assessment of unauthorized use fees and the suspension or cancellation of your permit.

If permitted livestock are required to leave the allotment early due to excess utilization or other reasons as determined by the Forest Officer, a refund may be requested. A written request for refund must be submitted to the District Ranger if this situation occurs.

## LIVESTOCK MANAGEMENT

The Stringer Pasture C&H allotment will be managed as described in this AOI and the Land and Resource Management Plan for the Boise National Forest (Forest Plan).

Compliance with the following standards will be emphasized; this is imperative. Familiarize yourself with this AOI and Forest Management direction. If you need more information about allotment management, contact the Cascade Ranger District.

For the first two years of the new grazing permit, a grazing system in which the North Pasture will be grazed first and the South Pasture will be grazed second will be implemented. This system will be implemented in order to allow for Aspen regeneration to occur on several small stands that occur in the North Pasture. After the first two years of the new grazing system, the cattle will be grazed in a two pasture deferred rotation system. Every year the first pasture grazed will be different than the previous year. Additional actions could occur depending upon Aspen condition as described in the Allotment Management Plan.

The Cascade Ranger District Range Specialist or Technician must be notified at least 5 days in advance and given the date, time, and place where livestock will enter the allotment to allow for counting livestock on the allotment.

Remove and dispose of dead animals at least 300 feet from water and roads and ½ mile from human habitation. Forest Service will be notified prior to disposal of dead animals on National Forest System lands. Disposal will not occur until approval of location and method is obtained.

**Range Readiness:** Spring moisture and temperature conditions may affect the time when livestock are allowed to turn out on the allotment. The Forest Service will notify you at least 2 weeks in advance of your scheduled turnout date if this occurs.

**Utilization:** It is the responsibility of the permittee to periodically monitor and document utilization during the grazing season. If utilization limits are reached prior to the scheduled off dates, livestock will be removed from the allotment early. The Forest Service will conduct end-of-season monitoring to determine if grazing use standards have been met.

Streambank utilization will be measured along the “greenline” in riparian areas and should not exceed the Forest Plan standard of no more than 45% in riparian areas or retain a minimum 4-inch stubble of hydric greenline species. In the flats or meadows adjoining these riparian areas and/or upland areas, we will adhere to the Forest Plan Standard of no more than 40% utilization for the early season pasture and 50% utilization for the late season pasture.

Upland grazing use should not exceed the Forest Plan standard of no more than 40 % use in early season or season long pastures and 50% use in vegetative slow growth or late season pastures. The Forest Service will periodically check the permittees utilization monitoring to ensure good land stewardship and perform documentation. At times, the permittees and the Forest Service will jointly inspect range conditions. It is your responsibility to remove livestock from the allotment area as soon as the utilization standards have been met.

**Noxious Weeds:** Work on noxious weed control will continue this year. These weeds are a continual, and in some places, an increasing problem. Your help is needed. If you find any populations of noxious weeds, please let the Cascade Ranger District know so arrangements can be made to start work on their control.

**Salt Placement:** Salt will be placed in containers and moved occasionally during allotment use to discourage concentrations of cattle for a long period of time. Salt will be removed from the allotment when the grazing season is completed. Salt will not be allowed in riparian conservation areas and placed away from any streams or riparian areas. Salting will be done where low use is observed. Historic salting locations will be avoided during the grazing season. There will be no salting within one-quarter mile water and 100 feet from roads where possible.

**Predator Problems:** If during the grazing season, you are having problems with predators notify, Wildlife Services. Through a memorandum of Understanding between Animal and Plant Health Inspection Service (APHIS) and the Forest Service, Wildlife Services is responsible for the control of predators. They will provide control services, technical expertise, recommendation of control methods, and reporting livestock as well as predator losses to the Idaho Department of Fish and Game (IDFG) and the Forest Service. You are allowed to protect your livestock from the immediate threat of predators. All other predator control must be conducted through the proper channels, as described above.

## **Wolves**

Questions about what can or cannot be done in reference to defending livestock, harassing wolves, or shooting wolves should be directed to Todd Grimm, USDA APHIS Wildlife Services in Boise, Idaho (208 378-5077); or local Wildlife Services contacts. Permittees should continue working with their local Wildlife Services representative on depredation issues. The US Fish and Wildlife Service (USFWS) is responsible for wolf management in Idaho. The wolf coordinator for USFWS is Hilary Cooley. Any questions you may have regarding wolf management should be directed to her and she can be reached at (208-685-6963).

## **Motorized Use**

The Forest Service Motor Vehicle Use Travel Management Rule (36 CFR §261.13) is in place on the Cascade RD, which prohibits motorized use off-road/trail. Public motorized wheeled vehicle use is prohibited on all NFS lands except on routes that are designated for motorized use on the current Motor Vehicle Use Map (MVUM). The permittee would be allowed to use wheeled motorized vehicles on all NFS routes for administrative use within the allotment for livestock management purposes. This administrative use includes salting and herding of livestock, maintenance of range improvements, and forage utilization inspections. Any other motorized vehicle use for allotment management activities shall be approved in writing by the District Ranger and approved routes would be monitored by Forest Service personnel. Use of heavy equipment, such as bulldozers or backhoes is **not** included in this authorization. Use of heavy equipment will need to be requested through and approved by the District Ranger on a case-by-case basis.

## **RANGE IMPROVEMENTS**

All range improvements listed and assigned to you in the term grazing permit must be maintained to a good functioning condition before livestock enter the pasture.

## **ALLOTMENT MONITORING**

The proposed monitoring on the allotment for the 2011 grazing season will be as follows:

1. Inspection compliance monitoring
2. Utilization monitoring
3. In-season stubble height monitoring
4. End-of-season stubble height monitoring
5. Grazing Response Index (GRI)

Close monitoring of utilization levels and diligent removal of livestock when they are reached is critical to ensure compliance with end-of-season utilization standards. Failure to meet these standards may result in the modification of grazing management following the adaptive management strategy.

Permittee monitoring of utilization levels is not mandatory, but is highly advised since the permittees will be held accountable to meet end-of-season compliance monitoring.

## **COORDINATION AND COOPERATION**

1. In cooperation with the State of Idaho, all feed, hay or straw brought to the allotment must be certified weed-free.
2. Report any known invasive plants in your grazing areas.
3. Report areas you have accidentally over-used so the Forest Service is aware of a critical situation before an unhappy public makes us aware of it. This will keep the Forest Service up to date and provide the opportunity to resolve the problem as necessary. In addition, it will reflect more positively on you as a good land manager.
4. It is recommended that the permittees use GPS units to record the location of each utilization monitoring site they inspect during the grazing season.

## **REQUIRED REPORTING**

Enclosed are year end grazing reports for you to record actual use data and range improvement maintenance for the 2011 grazing season for the Stringer Pasture C&H allotment. You need to record the date and number of cattle turned onto each allotment, the number and date cattle are removed from the allotment, and estimate the time and cost of management actions including livestock herding and improvement maintenance associated with the allotment. Accurate records of these dates, maintenance work, and range improvement needs should be kept and returned to our office at the end of the grazing season. The Forest Service uses these records to help allocate Range Betterment Funds. These funds are used to purchase materials for improvements. This report should be returned to the Cascade Ranger District no later than December 1, 2011.

## **COMPLIANCE WITH THE FOREST PLAN**

The Stringer Pasture C&H Allotment will be managed to achieve the Desired Future Condition as described in the revised Land and Resource Management Plan for the Boise National Forest. All permitted actions including grazing will comply with standards shown in the revised Forest Plan.

Utilization Standards from the revised Forest Plan are as follows:

Maximum forage utilization of representative areas within each pasture shall not exceed the values shown at the end of the grazing season. Variation in utilization standards in order to achieve specific vegetative management objectives shall occur with a site-specific or project level decision according to direction in FSM 1922.5.

1. Riparian Areas: Maximum 45 percent use of hydric greenline species.
2. Upland Vegetative Cover Types: Early season or season long pastures – 40% use.  
Vegetative slow growth, after seed ripe conditions, or late season pastures – 50% use.

## INSPECTIONS

Periodic inspections for compliance to the grazing permit and the annual operating instructions will be made by the Forest Service. Allotment inspections and unit examinations will be conducted during the grazing season to meet the utilization standards set forth in these instructions. Permittee participation in these activities is always encouraged.

These Annual Operating Instructions for the Stringer Pasture C&H allotment are consistent with Forest Plan management direction. If you have questions or the need to alter this plan during the grazing season, notify the Cascade Ranger District at 208-365-7000.

Signatures:

Clayton Nalder (Acting)  
District Ranger
